

Integrate the Jira with this existing codebase

Activity: Integrate the AI Agent with Jira by adding a "Connect Jira" feature that allows users to establish a connection using their Jira Base URL, Email ID, and Jira API Token. Once the connection is successfully established, retrieve and populate the available Jira user stories within the application. Ensure the implementation follows the existing project architecture, UI design, and coding standards while maintaining compatibility with the current functionality.

The screenshot shows a web application running on localhost:5173. The main heading is "User Story to Tests" with a subtitle "Turn user stories into comprehensive, structured test cases in seconds." A "Reset" button is in the top right. A "Connect to Jira" button is located below the heading. On the left, there are input fields for "Story Title", "Summary", "Description", and "Acceptance Criteria". On the right, a dashed box contains a pencil icon, the text "Your test cases will appear here", and instructions to fill in story details and hit "Generate". Below this are four buttons: "Positive", "Negative", "Edge", and "Authorization".

AI-Powered Test Generation

User Story to Tests

Reset

Turn user stories into comprehensive, structured test cases in seconds.

Generated Test Cases

12 test case(s) Model: openai/gpt-oss-120b Tokens: 2110

TEST CASE ID	TITLE	CATEGORY	EXPECTED RESULT
▶ TC-001	View own employee profile successfully	Positive	The employee's profile information is displayed correctly, matching the data stored in the system
▶ TC-002	Edit employee profile with valid data and save	Positive	A success message is shown and the updated information is persisted and displayed on the profile page
▶ TC-003	Upload profile picture with supported format	Positive	The new profile picture is displayed on the profile page and a confirmation message is shown
▶ TC-004	Attempt to save profile with invalid email format	Negative	An inline validation error is displayed indicating the email format is invalid and the profile is not saved
▶ TC-005	Attempt to save profile with required field left empty	Negative	A validation error is shown for the empty required field and the profile changes are not persisted
